Since its inception in 1945, Dutro Company has made quality and service our primary goals. We have thousands of satisfied customers who know from experience, the reliability of Dutro products.

Our plant in Logan, Utah, manufactures a complete selection of material handling equipment. Custom fabrication is our specialty. We will build items tailored to your needs or modify a catalog item in large or small quantities. We are committed to continuing the high quality and personal service on which our reputation has been built.

With over 60 years of manufacturing experience, Dutro steel delivery trucks have become the industry standard with its axle welded to the frame for extra stability.

We offer many different styles of hand trucks to suit your particular need. You can choose from a variety of handle and toe plate designs.

All of our steel delivery trucks are electro-statically powder coated.

Dutro Company is committed to providing its customers with the market’s finest products. When we discover a way to improve an existing product, that value is passed along to our customers. The items represented in this catalog may differ from their presentation. All dimensions are approximate and may vary. Dimension changes may be made without notice. Dutro Company carefully checks all products prior to shipment to ensure fitness for service. However, by the nature of their use, these products are subject to wear and tear and, often times, abuse. It is the responsibility of the owner/user to check over the hand truck or cart prior to use and to make repairs as required. Dutro Company takes no responsibility for personal injury or property damage that may occur while using a defective product.
CUSTOM FABRICATION

Dutro welcomes the opportunity to bid modified or custom carts and projects. With over 100,000 sq. feet of state-of-the-art manufacturing equipment, we can handle even large quantity custom work. With our own in-plant five stage washer and powder coat system, we can control quality and lead times. Our experienced staff can help design, modify and bid your new or existing projects. Please contact your local distributor to discuss your material handling needs.

DELIVERY

Dutro delivery line is recommended for the route driver who depends on the durability and versatility of his handtruck. Wide variety of wheel options for all delivery conditions combined with Dutro’s unique handle design makes Dutro the best delivery handtrucks available on the market. All axles are welded to the frame for extra stability. Toeplates can be specifically sized for your needs.

COMMITMENT

Dutro Company is committed to providing its customers with the market’s finest products. When we discover a way to improve an existing product, that value is passed along to our customers. The items represented in this catalog may differ from their presentation. All dimensions are approximate.

- Caster and Wheel

![Dolly Image](image-url)
3023

The Dutro Lowboy Triangular Drum Dolly features a patent pending design to allow the user to roll a dolly underneath a drum without the use of forklifts, drum lifters and other expensive equipment.

Heavy duty casters and heavy gauge steel for years of service. Easy bolt-together design allows for easy storage and quick replacement of parts. Tall clearance height allows for thresholds and large cement cracks.

PLATFORM

All items listed below, with the exception of the PT’s, have a removable handle. Standard platform trucks feature rounded corners and recessed handle sockets on all four corners to help protect merchandise, personnel, and buildings. Constructed of 12 gauge material with 2” x 2” x 3/16” angle cross braces for caster mounting.

Any size deck can be furnished on request. In addition, heavy duty casters and wheels can be added to increase load capacity.

Bolt-on Casters

PT’s are the only platform truck to come with Casters. However, you can add casters to any platform truck. The ability to replace casters and choose the wheels to best suit your needs is an option few in the industry provide. This will add years to the longevity of your material handling products, quality is always our number one focus!

Dutro has taken their experience in quality industrial trucks and applied that knowledge to retail handtrucks. Realizing most consumers are not happy with the quality of the little red import trucks we have developed a line of long lasting yet economical handtrucks. Stop buying the disposable imports and buy a handtruck that will be ready for use for the rest of your life.

STOCKING CART

Once again Dutro uses only the best in components. All of our tubular stocking trucks use high end casters adding extra quality where our competitors skimp. Our new CNC tube benders assure the quality of the frame. For the very best, look to the Blue!

Dutro tubular stock carts are made of 1” 14 gauge steel tubing and the all-welded construction makes them rugged and extremely durable. The 6 wheel tilt design allows easy turning in tight warehouse spaces or grocery store back rooms. With capacities up to 1400 lbs., these powder coated American made carts are capable of maximizing bulk loads. The casters and wheels provide smooth rolling even under heavy loads. Standard color: Dutro blue – other colors available on request. Please contact your local distributor for details.
H5B, H5B-SOLID

Pictured with solid top, but also available with tube top. Cart has been redesigned so rigid and swivel can be mounted to either end.

VENDING MACHINE

Designed to make moving appliances easier, the new belt systems and swing out put Dutro’s vending trucks on top of the market in durability, design and function. The new one belt retract system allows you to do the job easier.

A special series of trucks for video games and vending machines. The “Brute” will move up to 1600 lbs. The large rear wheels pivot back to handle the big load. The “Brawny Brute” also moves 1600 lbs. and is designed for use with large (over 62” tall) vending machines.

A safety wheel lock is available on models 1872-SB, 1878-SB, 1888 and 1888-78.

The lock supplied with the Brawny Brute (optional on the Brute) is only for breaking over the load when stopped on a level surface. It is not to be used as a brake for stopping, slowing or retaining the loaded or unloaded unit on either flat or sloped surfaces.

Our vending trucks are widely used by the leading bottlers.
