

HALO HOOK • D-LC126

The Halo Hook truck is constructed of quality steel and is built to the highest standards. Dutro Company, in conjunction with industrial gas manufacturers, has developed the Halo Hook truck. The most innovative truck in its class, the Halo Hook gets rid of the hazardous spring and hook systems of the past and replaces them with a unique self loading and unloading system.

SECURE SAFETY STRAP

No need to line up holes or lose fingers. Maintain a strong hold on cylinders during transport. Easily attaches and releases. Keeps valuable loads securely fastened.

REPLACEABLE CASTERS

Enjoy the value of years and years of use.

TOE SUPPORT DESIGN

Unique angled toe design allows for easy cylinder loading and unloading. Gives added support and strength when transporting cylinders.

QUICK RELEASE UNLOADING

System allows cylinder to rest on floor surface while conveniently releasing truck frame from underneath the cylinder body. Simply upward and forward pressure releases truck toes.

GENERAL SPECIFICATIONS

Height: 58 inches

Tubing: 1-inch 14 gauge

Width: 26 inches

Weight: 78 lbs.

Rear Casters: H.D. 6 x 2-inch
Mold-on Rubber

D-LC126 SPECIFICATIONS

Wheel Style: W-SP12

12" Polyurethane

Capacity: 900 lbs. (1 tank)

Bearings: Precision Bearings 3/4"

Dimensions: 12-inch

D-LC126-N SPECIFICATIONS

Wheel Style: W-N12

12" Pneumatic

Capacity: 1000 lbs. (1 tank)

Bearings: Precision Bearings 3/4"

Dimensions: 12-inch

Easy to load and unload, Silverline's unique liquid cylinder truck system protects your employees while providing maximum safety and stability for the cylinder's contents. Minimize your liability with this innovative solution.
